

Environmental Policy Statement

Environmental Management System

Computacenter is a leading European provider of IT infrastructure services and is committed to continuously improving the environmental impact of its business activities.

Computacenter's environmental policy will be enacted by an Environmental Management System covering major sites and operational areas that will: -

1. Comply fully with all relevant environmental legislation, regulations and other relevant requirements.
2. Identify the significant environmental impacts of its business.
3. Provide the framework for setting and reviewing environmental objectives and targets, including the reuse, recycling and reduction of all waste.
4. Actively prevent pollution and ensure an emergency response capability to cope with accidental pollution incidents.
5. Be documented, communicated to employees and used to improve awareness of environmental matters.
6. Be regularly reviewed and amended as appropriate.
7. Be certified to the International Management standard: BS EN ISO 14001:2015

This Computacenter Environmental Policy will be made available to customers, suppliers and the public.
