

EMPOWER EMPLOYEES THROUGHOUT THEIR WORKING DAY

DISCOVER HOW ORGANISATIONS CAN MAXIMISE PRODUCTIVITY, SECURITY AND THE USER EXPERIENCE WITH THE LATEST SOLUTIONS FROM COMPUTACENTER AND SAMSUNG.

The employee experience is vital to an organisation's success. To enable them to work to their full potential, employees need powerful technologies that enable simple collaboration, robust security and seamless mobility.

With solutions from Computacenter and Samsung, employees can work at their best throughout their working day:

9AM Get a new colleague up and running without delay

With centralised remote management and automation that enables near zero-touch deployment, IT teams can get new starters up and running on their Samsung devices quickly and efficiently. And with our best-fit, intuitive devices offering a great user experience, there's no delay to productivity.

10AM Work securely from home

Samsung's built-in security and flexible devices mean employees can work securely regardless of their location so corporate data and systems are protected. And with connectivity, cameras and microphones designed for video calling, employees can collaborate seamlessly with colleagues.

MIDDAY Greet visitors in style

Sometimes, only a face-to-face meeting will do. With LED signage, video walls, 8K and Crystal UHD screens from Computacenter and Samsung, organisations can make a lasting impression on clients and guests in lobbies, entrances and conference rooms.

OUTCOME STORY

2PM Hold a productive meeting

Our solutions ensure meetings go without a hitch. With Samsung Flip, attendees can easily share ideas and meeting notes, with seamless distribution to laptops and the ability to keep confidential information secure. And for those that couldn't make it in person, it's easy to add virtual attendees too.

4PM Resolve IT issues quickly and easily

A lost, dropped or damaged laptop could spell disaster for an employee's productivity. But with Samsung's device management capabilities and Computacenter's maintenance and break-fix services, organisations can quickly address issues and get employees working again with minimal disruption.

With mobile-first design, world-class components and security at the core, workplace solutions from Computacenter and Samsung help organisations meet their goals for mobility, sustainability and security.
