

# vPro™ Enablement Service

Computacenter provides unique client management services which enable organisations to take advantage of the new Intel® vPro™ technology.

## Business Challenge

Today's organisations have requirements for increased security and well-managed user environments, and as a result the cost of managing PCs represents a significant percentage of the total cost of ownership of technology. Are you:

- Managing many desktops across a large enterprise?
- Working within constrained budgets?
- Seeking to remove logistical inefficiencies?
- Seeking to reduce power consumption?
- Striving to reduce time-to-desk?
- Seeking to reduce user-downtime caused by malicious attacks?
- Under pressure to accurately inventory assets?

## Key benefits

Computacenter's vPro™ Enablement Service provides a structured approach to enable organisations to effectively apply vPro™ technology to address individual business needs.

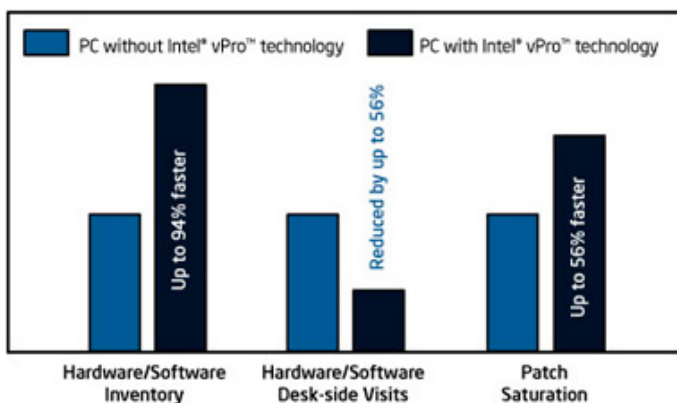

On the adoption of Intel® vPro™ technology organisations can benefit from:

- Reduced energy consumption and carbon footprint
- Increased employee efficiency
- Increased desktop availability
- Reduced support costs
- Proactive security
- Automated hardware and software asset tracking

Notebooks and desktop PCs which utilise Intel® vPro™ Technology are designed to deliver improved performance, improved energy efficiency, Security and management capabilities to meet Critical business challenges.

## Highlights

- vPro™ systems deliver 40% performance improvement with a 40% reduction in power consumption in the chip
- Management of PC 'off hours' enables additional reductions in power consumption
- Ability to remotely turn on PCs enables cost effective out of hours maintenance/manageability
- Reduced need for deskside visits saves time and money and enables improved resource utilisation
- Net increase in PC uptime leads to better user experience and workforce productivity
- Enabling automated, highly accurate asset Tracking and inventory updates
- Intelligent, hardware based security

## vPro™ Enablement Service

### Deliverables

Bespoke vPro™ workshop tailored to outline not only the functionality of vPro™ but to identify investments which will have the most beneficial impact on current projects, and the associated business benefits.

- Cost modeling based upon identified vPro™ feature set and customer investment
- Full report containing recommendations and a high-level proof-of-concept design, in support of business objectives and concerns
- Multi-vendor pre-provisioning providing a one-stop option for configuration

### Why Computacenter Services?

#### **Expertise from a vendor-independent partner**

We help our customers navigate the complex world of IT hardware and services by offering an independent service based on what works for the customer, not for us and our commercial agreements with manufacturers. This includes a unique multi-vendor proof of concept facility.

#### **Long and successful history of lifecycle management**

For many years we have been helping some of the UK's largest organisations manage the entire process of selection, purchasing, implementation, testing, managing, renewing and upgrading their products and services.

#### **Long-term approach**

We partner with customers, providing the best advice for them over the long-term, as opposed to pushing for a short-term spend decision. This can often mean not spending now, but rather waiting for more favourable terms.

#### **Large customer base**

We are able to leverage our buying power, negotiating more favourable terms with vendors as well as benchmarking pricing against other customer agreements.
