

## Computacenter triumphs at F5's 'Success 2010' EMEA partner conference

Computacenter, Europe's leading independent provider of IT infrastructure services and solutions, announced today that it has been recognised as 'Partner of the Year' for EMEA by F5 Networks, the global leader in Application Delivery Networking.

Presented at F5's 'SUCCESS 2010' annual Partner Summit, held in Budapest on 25-26 May, Computacenter was nominated in a number of categories, reinforcing both the strength of the business and depth of the F5 relationship.

"It is particularly pleasing to be recognised for all-around performance," said Ade Foxall, Networking Director, Computacenter. "Our investment in F5 is long-term and strategic for our business and supports our continued work to bring innovative solutions to our customers to help them achieve their goals. At Computacenter, we've seen a significant amount of growth through partnering with F5, and we're committed to maintaining this growth during 2010

and beyond by continuing to work together. To be singled out with this award is a validation of our collaborative efforts and, more broadly, the success we've had in being viewed as trusted advisers by our end-users."

"The winner of this award demonstrated excellence across our product range and across functional relationships," said Andy Travers, Regional Director UK, Ireland and Sub-Saharan Africa at F5 Networks. "The rewards F5 have gained from working with Computacenter exemplify why F5 puts so much effort into working closely with our channel."

### About F5 Networks

F5 Networks is the global leader in Application Delivery Networking. F5's flexible solution portfolio enables organizations to enhance IT agility and dynamically deliver application and data services that generate true business value. Global enterprise organizations, service and cloud providers, and Web 2.0 content providers trust F5 to keep their business moving forward.
