

NEARSHORE SERVICES FROM COMPUTACENTER: COMBINING GLOBAL REACH WITH LOCAL EXPERTISE

"Despite war and crises, there is a shortfall of 137,000 IT specialists in Germany."

Bitkom.org, November 2022

Time to think about alternatives: our Nearshore Professional Services Center of Excellence in Romania can help you implement your IT projects faster and more efficiently.

The top 5 reasons for nearshoring

1

Saves on costs and therefore makes a positive contribution to the value of your company.

2

Access to IT expertise, which, due to the shortage of experts in your own country, is not available or is only available with long lead times.

3

Own resources can be used for the core competences.

4

Makes it possible to implement IT projects significantly faster.

5

Strengthens competitiveness as it provides the flexibility required in the ever-changing world of technology.

5 questions you should ask yourself before you decide on nearshoring

Why nearshoring with Computacenter?

Computacenter has been a reliable IT services partner for over 40 years.

Computacenter Romania complements this long-standing expertise with the mentality and agility of an innovative and flexible start-up.

- Significant cost advantages
- Fast project implementation through short-term provision of resources (average 4-8 weeks)
- Center of Excellence with certified and accredited technicians who undergo continuous training
- Ever-growing pool of resources through close cooperation with universities
- Close co-operation with Computacenter's leading consulting experts to develop the best solution for you

Other location advantages of Computacenter Romania:

- EU member with strict data protection regulations
- Cultural and linguistic proximity (English, German and French)
- Only one hour time difference to Germany/France, two hours to UK

Our range of nearshoring services

SOFTWARE DEVELOPMENT

We **automate processes, modernise existing applications and develop and manage software** - so our work is always cutting edge. With our expertise we help corporate clients from a wide range of sectors to position themselves in the market and in increasingly complex business environments.

CLOUD ENGINEERING

Our Cloud Engineering service helps you **transform your cloud applications** by together **building and operating reliable systems, with the focus on efficiency, security and continuous improvement**. This service includes Cloud Support, Application & Platform Management, Infrastructure Automation (IaC) and Application Deployment (CI/CD).

FINOPS

Our FinOps for Public Cloud service helps you control the **costs and operation of your public cloud without sacrificing its benefits**. In this regard, it does not matter whether you are entering new territory with FinOps or have already invested in a FinOps platform and need support to make the investment affordable.

Cross-industry Expertise

- We operate Azure Cloud Engineering for a transport company so that the IT team can focus on strategic issues.
- We modernise and develop applications for public administration.
- We help an automotive supplier with the migration from on-premise to the cloud as well as with DevOps Enablement.
- We carry out application prototyping for a pharmaceutical company so that products can be brought to market more quickly.

Technologies and certifications

Computacenter Romania's professional services are based on a broad technology stack, which is being continuously expanded by our engineering community, as well as on numerous, long-standing technology partnerships.

Tools	Languages and Frameworks	Platforms

We are an official Microsoft Azure solution partner and our employees have a range of other certifications and accreditations from current IT providers.

How can we help you?

Your Computacenter Account Manager will be happy to advise you on how we can support you with our nearshore professional services.
