MANAGE YOUR IDENTITY RISK

THE CHALLENGE

As our customers explore the potential of the cloud and mobile computing, they encounter new risks & challenges. Digital transformation raises new security challenges.

A complex security landscape can leave many organisations unable to identify, assess and mitigate security risks in the overall threat landscape.

With the mass adoption of the hybrid working model organisations need to review policies and tools to ensure they're suitable and provide secure access for employees, and their devices, for wherever they choose to work from.

Our transformation services help our customers secure the new world of hybrid work.

SERVICE OFFERING

Enabling security for your employee's identity with Microsoft Defender for Identity, will help you rationalise and simplify your security management and realise tangible cost savings.

Reducing your total cost of ownership without compromising on security.

HELPING YOU ADOPT ZERO TRUST APPROACH

Validation

Validation of your existing readiness, confirming plans and dates.

Solution Design

Production of solution and technical product designs.

Pilot

A technical pilot to validate your Microsoft Defender for Identity solution.

Testing & Migration

Migration to and testing of your new Microsoft Defender for Identity security solution.

Service Delivery

A handover of the solution to your operational teams to ensure effective ongoing management.

OUR APPROACH

Microsoft Defender for Identity helps our customers manage identity risks helping security operations teams protect on-premises identities and correlate signals with Microsoft 365.

Our transformation service is flexible to meet your migration needs, from basic technology enablement to full migration from your existing solutions. Providing you with a modular approach to enable and migrate to Microsoft Defender for Identity.

Our approach ensures you have peace of mind with full visibility of the steps involved. We provide full scope of work documentation so you know what to expect from our migration, including costs and timescales. Our services are scalable to meet your endpoint estate.

Enabling you to leverage your existing Microsoft licence investments.
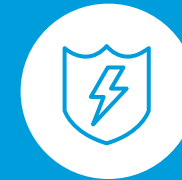

HYBRID WORKING

Hybrid working has blurred organisational boundaries – demands for anytime, anywhere access, and the exponential growth of collaboration tools, has created confusion for many organisations security controls.

Learn how you can leverage existing investments in security products and platforms that integrate with each other to provide insights across your workplace security stack.
