

CONSOLIDATE YOUR ENDPOINT SECURITY

THE CHALLENGE

As our customers explore the potential of the cloud and mobile computing, they encounter new risks & challenges. Digital transformation raises new security challenges.

A complex security landscape can leave many customers unable to identify, assess and mitigate security risks in the overall threat landscape.

Confusing and overlapping security tools and features are making it hard for organizations to identify measures and best practices that fully address their security concerns.

SERVICE OFFERING

Migrating your endpoint security to Microsoft Defender for Endpoint, will help you rationalise and simplify your security management and realise tangible cost savings.

Reducing your total cost of ownership without compromising on security.

YOUR JOURNEY TO ZERO TRUST

Validation

Validation of your migration readiness, confirming plans and dates.

Solution Design

Production of solution and technical product designs.

Pilot

A technical pilot to validate your end point solution and migration.

Testing & Migration

Migration to and testing of new solution and decommission of your existing solution.

Service Delivery

A handover of the solution to your operational teams to ensure effective ongoing management.

OUR APPROACH

Computacenter provides an end to end service that will migrate your existing 3rd party end point protection solution to Microsoft Defender for Endpoint.

Our Microsoft security consultants will guide and assist you with your migration, advising you on how to optimally configure Microsoft Defender for Endpoint to protect your organisation.

Our approach ensures you have peace-of mind with full visibility of the steps involved. We provide full scope of work documentation so you know what to expect from our migration, including costs and timescales. Our services are scalable to meet your endpoint estate.

Enabling you to leverage your existing Microsoft licence investments.

OPTIMISATION AND CONSOLIDATION

The use of differing workplace security solution vendors can create blind spots and make control more of a challenge for our customers

Consider consolidating and optimising security solutions to remove blind spots and give improved visibility and control. Leverage existing investments in security products and platforms that integrate with each other to provide insights across your workplace security stack.

BENEFITS

Reduce the need to manage multiple security vendors

Reduced procurement & renewals

Remove security blind spots

Reduce complexity & simplify operations

Increase your purchasing power
