

SECURE AND PROTECT YOUR OFFICE 365

THE CHALLENGE

As our customers explore the potential of the cloud and mobile computing, they encounter new risks, and digital transformation raises new security challenges.

A complex security landscape can leave many customers unable to identify, assess and mitigate security risks in the overall threat landscape.

Confusing and overlapping security tools and features are making it hard for organizations to identify measures and best practices that fully address their security concerns.

SERVICE OFFERING

By migrating your email security protection to Microsoft Defender for Office 365, you will improve your infrastructure security management and consolidate 3rd party products. Helping you safeguard against malicious email threats and links whilst contributing to operational cost savings.

Helping you reduce your total cost of ownership without compromising on security.

YOUR JOURNEY TO ZERO TRUST

Validation

Validation of your migration readiness, confirming plans and dates.

Solution Design

Production of solution and technical product designs.

Pilot

A technical pilot to validate any new or existing Office 365 protection policies and confirm solution readiness.

Testing & Migration

Enablement and testing of your new email and document protection policies.

Service Delivery

A handover of the solution to your operational teams to ensure effective ongoing management.

OUR APPROACH

The Microsoft security consultants at Computacenter provide an end to end service that can enable your company to utilise email and document protection with Defender for Office 365.

We will guide and assist you with your migration, and will advise on how to optimally configure Microsoft Defender for Office 365 to best protect your organisation.

Our approach ensures you have piece of mind with full visibility of the steps involved. We provide detailed scope of work documentation to ensure you know what to expect from our migration, including costs and timescales. Our services are scalable to meet your needs.

Enabling you to leverage your existing Microsoft licence investments.

OPTIMISATION AND CONSOLIDATION

The use of differing workplace security vendors can create blind spots and make control more of a challenge

Consider consolidating and optimising security solutions to remove these blind spots and give improved visibility and control. Leverage existing investments in security products and platforms that integrate with each other, to provide insights across your workplace security stack.

BENEFITS

No need to manage multiple security vendors

Reduced procurement & renewals

Remove security blind spots

Reduce complexity & simplify operations

Increase your purchasing power
