

WINNING TOGETHER

Our business is about technology.
But first of all, it's about people.

QA Automation Engineer

We are looking for an QA Automation Engineer to automate tests within complex projects to ensure product quality.

Responsibilities include designing and implementing tests, debugging and defining corrective actions. You will also review system requirements and track quality assurance metrics.

This role plays an important part in our company's product development process.

Our ideal candidate will be responsible for conducting tests before product launches to ensure software runs smoothly and meets client needs, while being cost-effective.

Responsibilities

- Review requirements, specifications and technical design documents to provide timely and meaningful feedback
- Create detailed, comprehensive and well-structured test plans and test cases
- Estimate, prioritize, plan and coordinate testing activities
- Design, develop and execute automation scripts
- Identify, record, document thoroughly and track bugs
- Perform thorough regression testing when bugs are resolved
- Develop and apply testing processes for new and existing features to meet client needs
- Liaise with internal teams (e.g. developers and product managers) to identify system requirements
- Monitor debugging process results
- Track quality assurance metrics, like defect densities and open defect counts
- Stay up to date with new testing tools and test strategies

Requirements

- Experience in developing automated testcases in at least one programming language
- Proven work experience in software quality assurance, especially web applications
- Hands-on experience with automated testing tools
- Strong knowledge in common web application technologies
- Strong knowledge of software QA methodologies, tools and processes
- Experience in writing clear, concise and comprehensive test plans and test cases

WINNING TOGETHER

Our business is about technology.
But first of all, it's about people.

- Experience working in an Agile/Scrum development process
- Experience with performance and/or security testing is a plus

About us

Computacenter is a leading independent provider of IT infrastructure services, with about 16,000 employees worldwide and a global revenue of £5.05 billion. We work at the heart of digitisation, advising organisations on IT strategy, implementing the most appropriate technology and managing our customers' infrastructures.

We offer a friendly, open working environment without too much fuss about hierarchy. We are looking for professionals with diverse competencies, personalities and strengths who want to live our shared value of teamwork and performance.

Interested in joining a company with a strong sense of community?

We're growing. We're hiring. We encourage. We empower. We support.
