WHY COMPUTACENTER:

Computacenter provides structured solutions and expert resources to help our customers to select, deploy and integrate digital technology, to achieve their business needs.

WHO WE ARE:

Computacenter is a leading independent provider of IT infrastructure services, enabling users and their businesses in a digital world. We advise organizations on IT strategy, implement the most appropriate technology, optimize its performance, and manage our customers' infrastructures. In doing this, we help CIOs, and IT departments in enterprise and corporate organizations maximize productivity and the business value of IT for internal and external users. Computacenter provides user support, the best devices, and the secure provision of applications and data to support individual working styles and improve collaboration. We also assist with technical consulting, the implementation and operation of networks and data center infrastructures on or off customers' premises and in the cloud.
