THE SOLUTION

SECURITY AND MONITORING ANALYTICS FROM COMPUTACENTER

splunk

RADAR
CYBER SECURITY

KEY BENEFITS

A single partner to procure, design, manage and improve the SIEM platform

Reduce cost of SIEM support, gain access to scarce skills, remove risk of staff retention

Flexible options: improve and enhance existing SIEM or outsource service

Constantly assess SIEM operation - how to evolve and enhance

SERVICE OVERVIEW

A packaged service helping our customers to select, procure and implement SIEM technology, with options to improve and enhance existing SIEM implementations, in particular splunk. Take advantage of flexible SIEM operations outsourcing where Computacenter will adopt and optimise existing technology or deploy our own specialist solution based on Radar Cyber Security. With additional cyber security services focused on vulnerability detection and assessment our Packaged Security Monitoring and Analytics service can enhance existing protection, improve detection and optimise technology investments.

WHAT MAKES US DIFFERENT

- Combination of tailored profession and managed services covering procurement, design, implementation and management of SIEM technology and tooling
- Specialist Splunk skills within our SIEM Center of Excellence
- Flexibility outsourcing options, either our own specialist SIEM solution or optimisation of existing customer tooling investments
