

# MAKING DIGITAL WORK IN BUSINESS SECURITY

Leading **pan-European** security provider

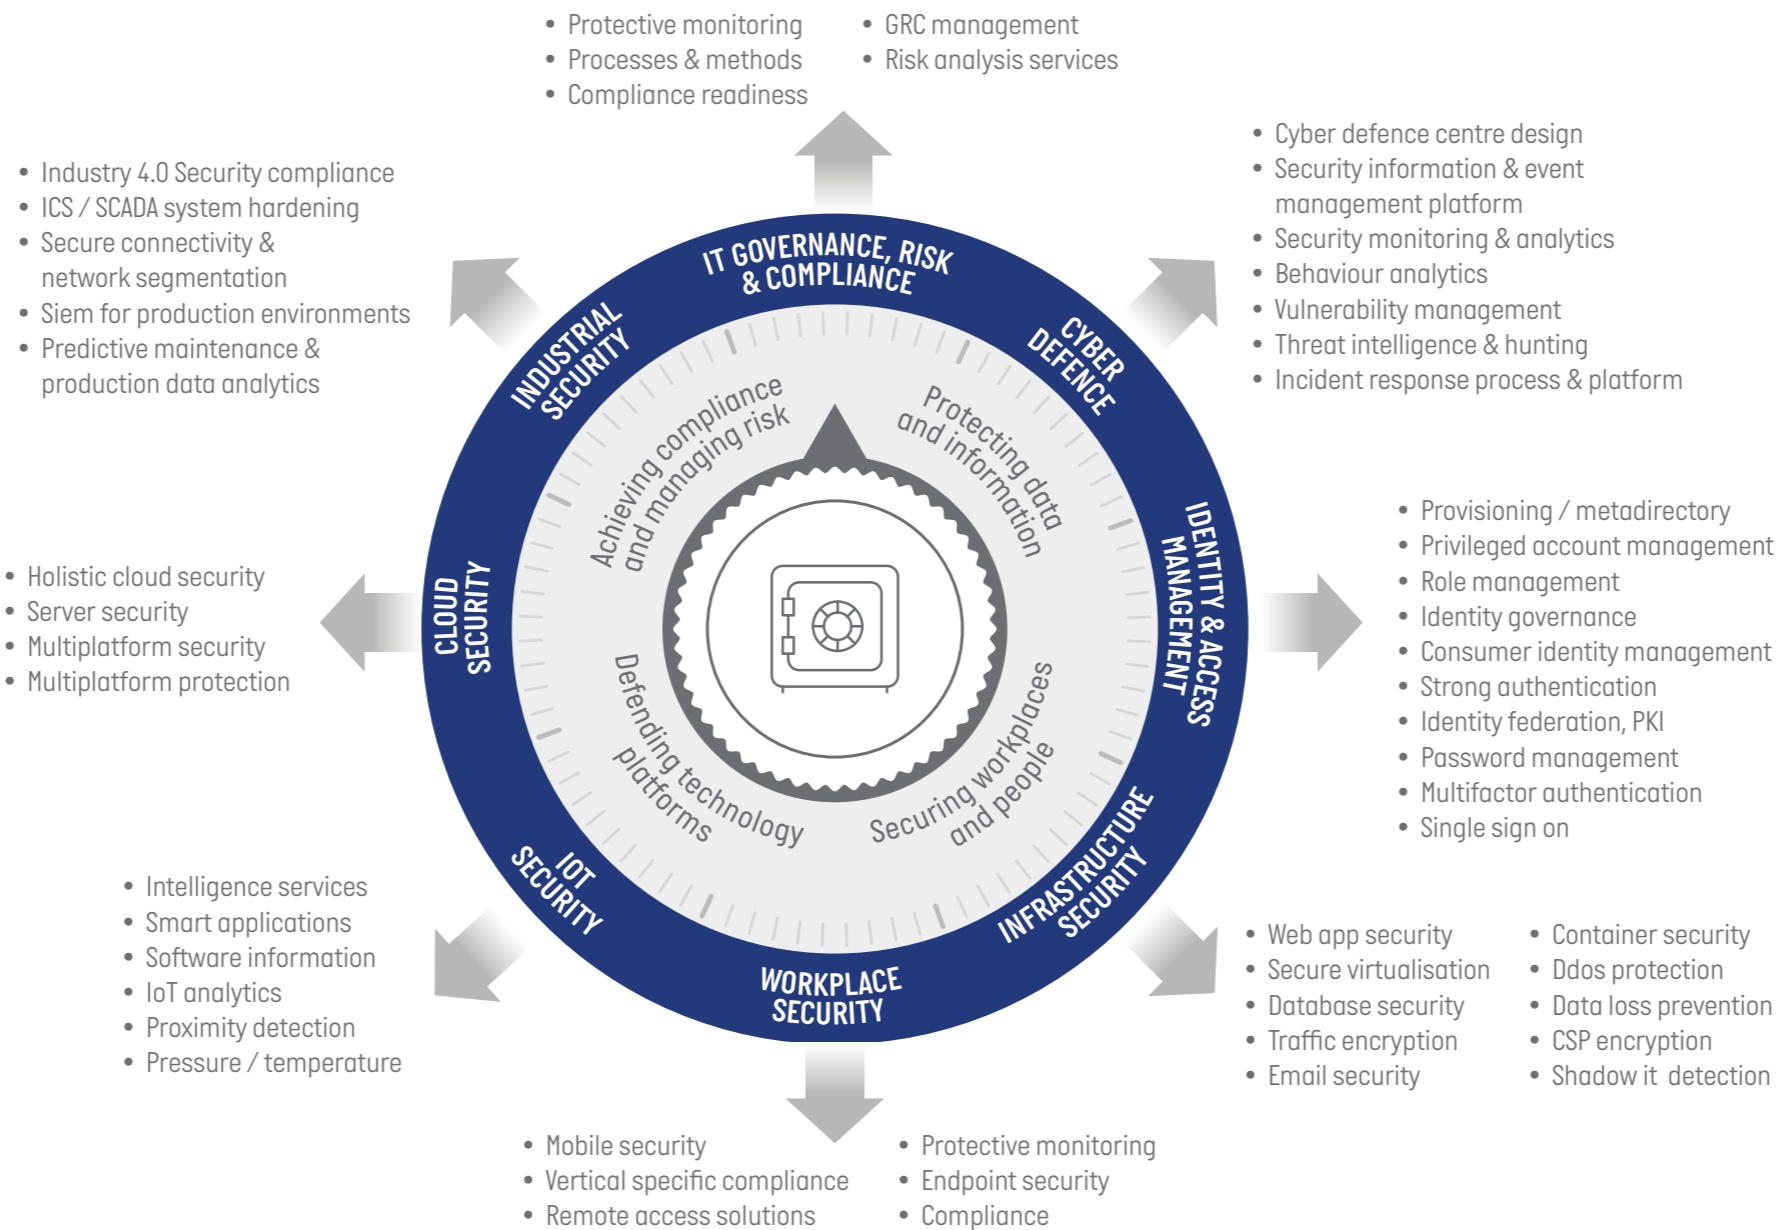

**20+** years' dedicated security practice

**7.2m** unique security events handled per year

**4800+** major incidents managed on behalf of customers per year

**200+** vendor accreditations

**200+** highly skilled security experts

## KEY BENEFITS

**Achieving compliance and managing risk:** improving business performance and operational efficiency

**Protecting data and information:** retaining business IP and competitive advantage

**Securing workplaces and people:** enhancing user satisfaction, customer engagement and productivity

**Defending technology platforms:** for increased resilience, agility, and confidence

**At Computacenter, we know organisations need assurance that their IT is truly secure, so they can grow and make strategic decisions with total confidence.**

Computacenter helps you master business security, by making business outcomes secure; to identify vulnerabilities, close security gaps and establish controls for a secure state that protects data, IP, processes, and systems.

As a secure IT provider and IT security provider, we deliver expertise and products at every stage of the cybersecurity cycle. We help organisations secure workplaces and people, and defend technology platforms. We help you deploy critical security skills, govern risk and compliance; and address data privacy requirements – protecting your users, your customers and your data.
