

ARE YOU OUR NEW COLLEAGUE?

Computacenter is Europe's leading independent provider of IT infrastructure services, enabling users and their business. We advise organizations on IT strategy, implement the most appropriate technology, optimize its performance, and manage our customers' infrastructures. In doing this we help CIOs and IT departments in enterprise and corporate organizations maximize productivity and the business value of IT for internal and external users.

Rooted in core European countries Computacenter combines global reach with local expertise. We operate Infrastructure Operations Centers and Group Service Desks across Europe, South Africa and Asia from which our employees provide user support in 18 languages. Customers with global requirements are served through an extensive international partner network, which mirrors the requirements of our European-headquartered client base.

KNOWLEDGE & KEY SKILLS

ESSENTIAL

- We're looking for someone that can be flexible to work at customer sites across Belgium when required.
- Achieves profitability and customer satisfaction on projects through astute commercial management
- Develop, build and maintain strong relationships both internally and externally in order to achieve project objectives.
- Produce management reports through relevant tools to provide up to date information on project progress.
- Produce required project documentation to enable successful project outcomes.
- Coordinate and plan resource requirements to ensure project outcome deadlines are adhered to.
- Compliance with Projects Practice lifecycle to ensure best practice.

Computacenter Belgium is looking for a

Project Manager

ROLE

We deliver a range of infrastructure projects typically including contractual service transitions, transformations, data centre relocations, windows client rollouts, windows migration projects, network implementations; network audit, cabling and IP projects, printing solution projects and a range of Cloud related engagements such as Office 365; you'll work across this project range, getting to know many different customers.

If you're a Project Manager looking for a high level of autonomy and end-to-end responsibility tasks within a project context, including support, reporting on costs / charges, managing parts of projects, administration, and scheduling and booking resources, Computacenter Belgium is the place to be.

REQUIREMENTS

- Your role will extend from producing bids and running PDWs to final delivery of the project.
- This will mean taking charge of internal and supplier resource and team management, estimating, planning, commercials and risk management.
- You will typically undertake individual projects with a value over €750k and with varying degrees of complexity, but could also be part of a team and responsible for activities on projects with a significantly higher value.
- Give proposal for project strategies.
- Guide the team in charge of project activities and review their deliverables.
- Participate in functional working groups and progress meetings.
- You will be part of a close-knit Projects and Program team, you will enjoy an environment where people support and respect each other.
- We'll empower you to find and deliver the solutions that put customer needs first, trust your judgement to make the big decisions and give you the space to get things done.
- Be accountable for delivering projects in time, on budget and in scope with the needed quality to ensure a successful launch.

For internal applications, please inform your direct management that you are applying for a new challenge.

If you meet the above criteria and you are looking for a new challenge, we welcome you to send us a detailed resume and motivation letter to
