

EMBRACE TECHNOLOGY, ENHANCE YOUR BUSINESS

The way technology is utilised in the workplace can make all the difference to an employee's productivity and job satisfaction.

Follow the journey of a new employee in the digital workplace, to discover how the technology we provide lets her hit the ground running and instantly feel part of the team.

FIRST DAY ON THE JOB

Sonia is given a Surface Pro that just needs a password to get started. All relevant applications and tools are set up and ready to go.

She's ready to start work straight away, and doesn't need to rely on the rest of the team for support.

GETTING INTO THE SWING OF THINGS

Sonia can seamlessly communicate with colleagues and clients across the world.

Her device has security features which allow her to work flexibly and securely.

THE RESULT

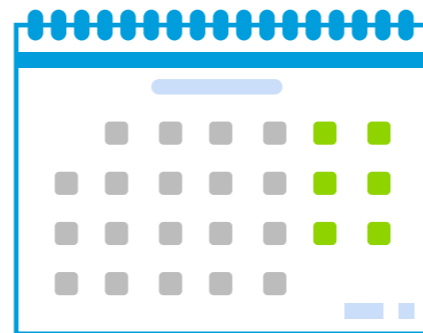

A happy, productive employee, enabled to do her job the best of her ability.

She doesn't waste time struggling with unnecessary admin.

FINDING HER FEET

Sonia's email, calendar and other work-related tools are already configured.

The right people, information and resources are easily accessible.

SETTLED IN TO A NEW WAY OF WORKING

Computacenter's Next Generation Service Desk means support is there whenever Sonia needs it.

She can easily personalise her digital set-up.

To discover the best way to transform your digital workplace, contact your Computacenter Account Manager today.
