Enabling users and their business
Computacenter is the leading independent provider of IT infrastructure services and... Computacenter is a public company quoted on the London FTSE 250 and employs approx. 15,000 people worldwide.

SEE THE WOOD
OR IS IT REALLY OPPORTUNITY?

LOOK TO THE SKIES, OR KEEP YOUR FEET ON THE GROUND?

1 MIGRATING YOUR SERVICES TO THE CLOUD

- With Microsoft Azure, there are two main choices: organisation, and speed and latency may not be what you need for some key applications.
- Cloud migration offers high availability, a strong security profile and scalability – exposing those businesses that can technically cater for them.
- Intel's latest XEON Scalable and Optane technologies are designed entirely with the modern data center in mind. The outcome is the overall performance levels you need and demand from your own data center.

2 INVESTING IN ON-PREMISE

- Server consolidation and cloud migration are not the only options available. Hyper-converged solutions can offer a significant reduction in the amount of hardware that an organisation needs to manage.
- For many organisations, upgrading your on-premise capability is not always the best solution. Other options include: Hyper-converged for a version free, and automatic updates; and enhanced security – exposing those organisations using security updates necessary patches – all of which will...compliance risks.

3 A BLENDED SOLUTION?

- Do you do both? A hybrid approach is a realistic option for many organisations, upgrading your on-premise capability by upgrading your servers takes...
