IT designed for people *me.*

COMPUTACENTER STEERS CAMELOT TO LEADING-EDGE CONFIGURATION MANAGEMENT

Computacenter has successfully migrated Camelot's outdated Altiris configuration management system to Microsoft's leading-edge SCCM in under three months. Computacenter now also takes on the responsibility for managing the SCCM licence procurement, as well as providing additional project and consultancy services.

OBJECTIVES

Camelot were looking for a suitable partner to migrate their ageing configuration management system away from Altiris to Microsoft's SCCM, and to then manage the supply chain around licence procurement. The objective of deploying SCCM was to improve Camelot's visibility of their desktop environment. This modernisation of configuration management will play a small part in contributing towards Camelot's overarching objective to "maximise returns for good causes".

SOLUTION

- A configuration management system migration from Altiris to SCCM in under three months.
- Provision of 1,500 SCCM licences.
- Project and consultancy services to ensure smooth delivery of the technical objectives.

DELIVERED OUTCOME

- Camelot now have a product that is highly automated and which delivers greater visibility of their desktop estate.
- The new SCCM solution also delivers a more up-to-date and agile tool which provides a better end-user experience.

“A successful project with a great team from Computacenter who worked at the pace that Camelot needed to work to.”

Paul Rooth, Configuration Manager, Camelot
