

WINNING TOGETHER

Our business is about technology.
But first of all, it's about people.

Principal SharePoint Developer

We are looking for a Senior SharePoint Developer to help us build a group wide solution that has been developed for the capture and consolidation of customer activity and data in a single platform that is used by thousands of users across Computacenter countries.

Responsibilities include a complex range of technical work activities and developing best practice procedures and guidelines to ensure consistent compliance to customer and company standards.

Responsibilities

- Design, build, and maintain efficient, reusable, and reliable code
- Identify bottlenecks and bugs, and devise solutions to these problems
- Help maintain code quality, organization, and automatization
- Ensure the best possible performance, quality, and responsiveness of the applications
- We're always evaluating new technologies and innovations, so you will be able to contribute with your past experience and interests to the team.

Requirements

We are looking for candidates who are able to communicate on complex issues to meet business requirements. So while the exact tech stack you know is not so important, you should have some experience in the following areas in your current or previous job:

- 5+ years SharePoint development experience with a focus on client-side development
- Advanced understanding of SharePoint architecture including advanced search configuration
- Experience with frontend technologies: React or other JS framework, HTML, CSS(SCSS)
- Familiar with PowerShell, Nintex Workflows and Nintex Forms
- Solid understanding of object-oriented programming
- Familiar with various design and architectural patterns
- Very good English skills

WINNING TOGETHER

Our business is about technology.
But first of all, it's about people.

About us

Computacenter is a leading independent provider of IT infrastructure services, with about 16,000 employees worldwide and a global revenue of £5.05 billion. We work at the heart of digitisation, advising organisations on IT strategy, implementing the most appropriate technology and managing our customers' infrastructures.

We offer a friendly, open working environment without too much fuss about hierarchy. We are looking for professionals with diverse competencies, personalities and strengths who want to live our shared value of teamwork and performance.

Interested in joining a company with a strong sense of community?

We're growing. We're hiring. We encourage. We empower. We support.
