

WORKFORCE SERVICES

WE PROVIDE SKILLED IT RESOURCES FOR ALL SIZES OF PROJECTS, DELIVERING THE RIGHT RESOURCE TO GET THE JOB DONE.

Whether skilled IT resources are required for complex or large-scale projects or you need help filling skills gaps for short-term tasks, Computacenter TeraMach's Workforce Services can deliver the right resource for the job.

CompuaCenter TeraMach Solution

Determining the right resource for any company begins with understanding the technical requirements of the job and the culture of the work environment.

We take a partnership approach with our clients. We begin by identifying your challenges and goals. Our process allows us to prioritize client needs and provide the right value-added resource.

Computacenter TeraMach uses our years of Workforce Services experience to create a staffing solution that meets your technical requirements and cultural needs.

We offer Staff Augmentation and On-Demand Consulting Services to address both short- and long-term needs and will work to get you the right talent at the best value for your business.

Contract: Perfect when you require specialized skill sets, or when you are facing an expedited deadline and lack the bandwidth or don't have the budget to hire permanent resources.

Contract to Hire: Ideal for "trying out" a new resource to ensure you have the right fit; also, a good option when your need exists today but the budget to hire is forecasted in the future.
